EXPERIENCE

Software & Automation Engineer

Thrive Tech

- 06/2026 - Present Cuddalore, TN
- Develop backend automation scripts, custom event listeners, and scheduled jobs using Python, Groovy, and Script Runner, reducing manual administrative
 - Administer four core Atlassian platforms and provide L2/L3 support for configurations and workflows.
 - Diagnose and resolve security and application issues, enhancing Jira's operational stability.
 - Engineer workflows and automation rules using three scripting technologies to optimize administration tasks.
 - Execute comprehensive Jira Cloud-to-Cloud migrations across five critical stages.
 - Implement YouTrack administration to support project and Agile board adoption.
 - Administer JSM service components, including customer portals and integrations, to ensure service efficiency.
 - Build executive analytics with EazyBI and Advanced JQL, focusing on team velocity and SLA compliance.
 - Atlassian Tools Administrator
 - Design and deploy RESTful API integrations and webhooks to establish bidirectional synchronization between Atlassian Cloud systems and third-party software platforms
 - Architect complete Jira Cloud-to-Cloud data migration processes, executing scheme mappings, API payload validations, and post-cutover data integrity verification
 - Formulate complex MySQL queries and Advanced JQL data filters to power real-time analytics engines, tracking team velocity, SLA compliance, and operational KPIs
 - Administer Agile tracking frameworks across Jira Software and YouTrack, standardizing team backlogs, sprint boards, and continuous delivery workflows

Software & Automation Intern

Thrive Tech

- 10/2024 - 05/2026 Cuddalore, TN
- Engineered Jira Automation rules for automated ticket assignments, conditional field inheritance, and status transitions, improving workflow throughput
 - Built validation scripts and test audit routines to verify user mapping, permission schemes, and database consistency during enterprise platform transitions
 - Collaborated with cross-functional development teams to configure Scrum/Kanban boards, backlog hierarchies, and documentation spaces in Confluence
 - Resolved L2/L3 software and configuration tickets, diagnosing REST API response mismatches and workflow script issues to maintain high platform uptime

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Christ College of Engineering and Technology

2022 - 2026 Puducherry, India

PROJECTS

Real-Time Fraud Detection System using AI

- Lead AI Developer (Final Year Capstone Project)
- Increased fraud detection by {95%} and minimized risk by engineering a real-time anomaly detection pipeline using Python
 - Automated data preprocessing, imputation, outlier removal, and normalization pipelines for high-frequency data.
 - Optimized decision classification thresholds to balance precision and recall, reducing false-positive alerts while ensuring rigorous fraud detection accuracy
 - Conducted inference latency benchmarking and feature importance evaluations to validate model stability and fast execution during high-throughput peaks

SUMMARY

Performance-driven Software Development Engineer and Computer Science graduate specializing in full-stack web engineering, backend workflow automation, and Applied Artificial Intelligence. Skilled in developing scalable Python algorithms, RESTful APIs, and responsive front-end interfaces, alongside robust database schema optimization in MySQL. Practical expertise includes developing real-time anomaly detection pipelines, automating enterprise system integrations, and architecting seamless data migrations. Recognized for strong analytical thinking, clean code design, and cross-functional agile delivery across high-impact projects

KEY ACHIEVEMENTS

- Automation Excellence**
Reduced manual tasks by automating and jobs.
- Effective Data Migration**
Migrated data seamlessly Jira Cloud systems.
- AI Fraud Detection Lead**
Engineered system for real-time, accurate fraud detection.
- Workflow Efficiency Enhancement**
Improved workflow by engineering Jira Automation rules.

SKILLS

Programming Languages

Python	JavaScript	Groovy	SQL (MySQL)
Java fundamentals			

AI & Machine Learning

Supervised & Unsupervised Learning	
Anomaly Detection	Predictive Modeling
Data Preprocessing	Feature Engineering
Model Optimization	

Web & Full-Stack Development

HTML5	CSS3	JavaScript	RESTful APIs
JSON Web Services		Backend Integration	
Responsive UI Engineering			
Web Development Tools			

Mobile & Software Platforms

Android Studio	Atlassian Forge CLI
Script Runner	Jira Automation Architecture
YouTrack	

PROJECTS

Student Information & Academic Management System

- Full-Stack Web & Database Developer
- Designed and deployed a full-stack database application enabling secure management and rapid retrieval of student enrollment and academic performance records
 - Architected a normalized MySQL relational schema with primary and foreign key constraints, enforcing data integrity and zero data redundancy
 - Built responsive front-end interfaces integrated with backend endpoints to execute efficient, parameter-sanitized SQL queries
 - Implemented client- and server-side validation routines alongside structured error-handling to prevent malformed inputs and ensure reliable uptime

THRIVE TECH PROJECTS

	HCL Syneos Technology Solution - Technical support & Data Analytics Engine	 06/2025 - 08/2026
	HCL Syneos - Cloud Architecture & Project Migration	 11/2024 - 05/2025
	ICICI Prudential – Jira Cloud Project Migration and Workflow Standardization Custom Description	 01/2026 - 02/2026
	ICICI Prudential – Confluence and Jira Cloud Administration Custom Description	 02/2026 - 08/2026

SKILLS

Database & Data Architecture

Relational Schema Design (MySQL)	
Database Indexing	Data Normalization
Pipeline Verification	Advanced JQL

Software Engineering & Practices

Object-Oriented Programming (OOP)		
Data Structures & Algorithms		
Agile/Scrum Methodologies	SDLC	
Unit Testing	Incident Tracking	ITIL/ITSM

Core Competencies

Analytical Problem Solving	Algorithm Design
Cross-Functional Teamwork	Rapid Adaptability
Time Management	

CERTIFICATIONS

Artificial Intelligence Fundamentals
IBM SkillsBuild

AI Enablement for Customer Service
IBM SkillsBuild

Full Stack Web Development Certification
NextGen Solutions

Internet of Things (IoT) Engineering
Industry Internship
