Cuddalore, Tamil Nadu, India- 607002

PROFESSIONAL SUMMARY

Performance-driven Software Development Engineer and AI Enthusiastic specializing in full-stack web engineering, backend workflow automation, Applied Artificial Intelligence, and Atlassian platform administration. Skilled in Python, JavaScript, Groovy, SQL (MySQL), RESTful APIs, responsive front-end development, database schema-optimization, real-time anomaly detection, enterprise system integrations, and Jira Cloud administration. Experienced in Jira Cloud-to-Cloud migrations, workflow automation, Agile/Scrum environments, Advanced JQL and eazyBI, Big Picture and cross-functional software delivery. Available to join immediately with zero notice period.

WORK EXPERIENCE

Software & Automation Engineer

Thrive Tech

06/2026 – 08/2026

Cuddalore, Tamil Nadu

- Developed backend automation scripts and using Groovy and Script Runner, Listener to reduce manual administrative work.
- Administrator for four core Atlassian platforms and provided L2/L3 support for configurations, workflows, security, and application issues.
- Engineered Jira workflows and automation rules using multiple scripting technologies to optimize administration tasks.
- Executed Jira Cloud-to-Cloud migrations across five critical stages, including scheme mappings, API payload validation, and post-cutover data integrity verification.
- Implemented YouTrack administration to support project and Agile board adoption.
- Administered Jira Service Management (JSM) service components, including customer portals and integrations.
- Built executive analytics using eazyBI and Advanced JQL to track team velocity, SLA compliance, and operational KPIs.
- Designed and deployed RESTful API integrations and webhooks for bidirectional synchronization between Atlassian Cloud systems and third-party software platforms.
- Formulated complex MySQL queries and Advanced JQL data filters to support real-time analytics.
- Administered Agile tracking frameworks across Jira Software and YouTrack, standardizing backlogs, sprint boards, and continuous delivery workflows.

Software & Automation Intern

Thrive Tech

10/2024 – 05/2026

Cuddalore, Tamil Nadu

- Engineered Jira Automation rules for automated ticket assignments, conditional field inheritance, and status transitions to improve workflow throughput.
- Built validation scripts and test audit routines to verify user mappings, permission schemes, and database consistency during enterprise platform transitions.
- Collaborated with cross-functional development teams to configure Scrum/Kanban boards, backlog hierarchies, and documentation spaces in Confluence.
- Resolved L2/L3 software and configuration tickets by diagnosing REST API response mismatches and workflow script issues.

QUALIFICATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Christ College of Engineering and Technology

2022 – 2026

Puducherry, India

ACADEMIC PROJECTS

Real-Time Fraud Detection System

Lead AI Developer – Final Year Capstone Project

- Increased fraud detection by 95% by engineering a real-time anomaly detection pipeline using Python.

- Automated data preprocessing, imputation, outlier removal, and normalization pipelines for high-frequency data.
- Optimized decision classification thresholds to balance precision and recall, reducing false-positive alerts while maintaining fraud detection accuracy.
- Conducted inference latency benchmarking and feature-importance evaluation to validate model stability and execution speed during high-throughput peaks.

Student Information & Academic Management System

Full-Stack Web & Database Developer

- Developed and launched a full-stack database solution that securely managed and rapidly retrieved 100 student enrollment and academic performance records, reducing data access time by 98%.
- integrity and reduce data redundancy.
- Built responsive front-end interfaces integrated with backend endpoints and parameter-sanitized SQL queries.
- Implemented client-side and server-side validation and structured error handling to prevent malformed inputs and improve application reliability.

THRIVE TECH PROJECTS

- | | |
|--|-------------------|
| • HCL Syneos Technology Solution – Technical Support & Data Analytics Engine | 06/2025 – 08/2026 |
| • HCL Syneos – Cloud Architecture & Project Migration | 11/2024 – 05/2025 |
| • ICICI Prudential – Jira Cloud Project Migration & Workflow Standardization | 01/2026 – 02/2026 |
| • ICICI Prudential – Confluence & Jira Cloud Administration | 02/2026 – 08/2026 |

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Groovy, SQL (MySQL), Java fundamentals

AI & Machine Learning: Supervised Learning, Unsupervised Learning, Anomaly Detection, Predictive Modeling, Data Preprocessing, Feature Engineering, Model Optimization

Web & Full-Stack Development: HTML5, CSS, JavaScript, RESTful APIs, JSON Web Services, Backend Integration, Responsive UI Engineering

Atlassian & Software Platforms: Jira Cloud, Jira Software, Jira Service Management (JSM), Analytics, Confluence, Atlassian Forge CLI, Script Runner, Jira Automation, YouTrack, EazyBI, Big Picture, Zephyr Scale, Structure, Xray Test Management, Advanced JQL.

Database & Data Architecture: MySQL, Relational Schema Design, Database Indexing, Data Normalization, Pipeline Verification

Software Engineering: Object-Oriented Programming (OOP), Data Structures & Algorithms, Agile/Scrum, SDLC, Unit Testing, Incident Tracking, ITIL/ITSM

Core Competencies: Analytical Problem Solving, Algorithm Design, Cross-Functional Teamwork, Rapid Adaptability, Time Management

CERTIFICATION

- Artificial Intelligence Fundamentals – IBM SkillsBuild
- AI Enablement for Customer Service – IBM SkillsBuild
- Full Stack Web Development Certification – NextGen Solutions
- Internet of Things (IoT) Engineering – Industry Internship
